

## **AlertDialog Basic**

```
class MainActivity : AppCompatActivity() {
override fun onCreate(savedInstanceState: Bundle?) {
    super.onCreate(savedInstanceState)
    setContentView(R.layout.activity_main)
    btnExit.setOnClickListener { it: View!
        val dialog = AlertDialog.Builder( context: this)
        dialog.apply { this: AlertDialog.Builder
            setTitle("Confirm Window?")
            setMessage("Do you want to close this app?")
            setNegativeButton( text: "No"){ dialogInterface: DialogInterface, i: Int ->
                dialogInterface.dismiss()
            setPositiveButton( text: "Yes"){ dialogInterface: DialogInterface, i: Int ->
                 finish()
            setCancelable(false)
        dialog.show()
```
